ABSTRACT:

PROBLEM TO BE SOLVED: To provide a place where self-creation information is widely appealed to the creators of various creation information, who generally exist in the world, and to reduce a part of profit obtained by the sales of creation information to the creator as a royalty.

SOLUTION: When the registration request of a picture is given from a creator terminal 3 by general application on a server 1 side, a series of registration procedures are requested and the produced picture transmitted from the creator terminal 3 in accordance with a series of registration procedures is

registered  
to the database of the picture in accordance with the creator. The  
content of  
the picture database is transmitted/delivered to respective printing  
terminals

2. The printing terminals 2 print the picture that a user  
arbitrarily selects  
from the produced pictures of general application on a prescribed  
printing  
object.
